Overheat Prevention System

In order to protect you and your product, we have equipped this display with an overheating prevention system. This system activates before the internal components are damaged, displaying a warning message followed by an automatic shutdown.

Auto-Condition Reporting (ACR)

ACR provides real-time readouts showing power supply & LED backlight operation, internal temperature and input activity. This greatly reduces diagnostic turn-around time, improves service planning & maintenance, and ensures minimal downtime for your video wall.

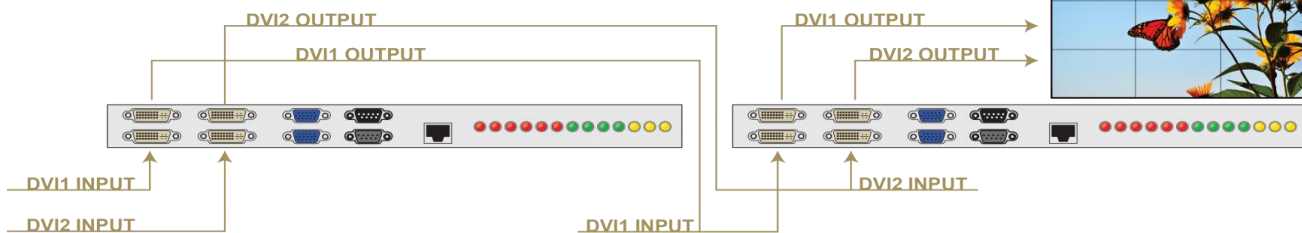

ACR Hub

- ❖ LED display status indicators
